|                                                                                                                                                                                       | PAGE |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| ARROW, Gilbert J., F.R.E.S. Dimorphism in the males of Coleoptera . . . . .                                                                                                           | 113  |
| AUBROOK, Edward W. Notes on a brood of <i>Callimorpha dominula</i> (L.) ab. <i>medionigra</i> Cockayne (Lepidopt., ARCTIIDAE) . . . . .                                               | 13   |
| BANKS, C. J. Cephalic glands in the CORIXIDAE (Hemipt.) . . . . .                                                                                                                     | 83   |
| BODENHEIMER, Prof. F. S., F.R.E.S. On the zoogeographical character of the Coccid fauna of Central Asia . . . . .                                                                     | 9    |
| BRINDLEY, Maud D., F.R.E.S. Observations on the life-history of <i>Euphorus pallipes</i> (Curtis) (BRACONIDAE), a parasite of Hemiptera-Heteroptera . . . . .                         | 51   |
| BURT, E., F.R.E.S. Some minute Diptera associated with Millipedes in Tanganyika . . . . .                                                                                             | 90   |
| CARPENTER, Prof. G. D. Hale, D.M., F.R.E.S. A further note on <i>Pseudacraea eurytus</i> (L.) (Lepid. NYMPHALINAE) and its models in Eastern Uganda . . . . .                         | 18   |
| A Letter from A. R. Wallace to F. P. Pascoe, written from Ternate, 20 December 1860. Note by Professor HALE CARPENTER . . . . .                                                       | 77   |
| Resemblance of a Geometrid moth <i>Amnemopsyche</i> ( <i>Agirpa</i> ) <i>wardi</i> E. M. Sharpe to the butterfly <i>Acraea acerata tenella</i> Rog. in the Congo . . . . .            | 87   |
| CORBET, A. Steven, F.R.E.S. <i>Catopsilia pomona</i> (Fab.) and <i>Catopsilia crocale</i> (Cram.) (Lepid.) . . . . .                                                                  | 6    |
| DONISTHORPE, H. St. J. K., F.Z.S., F.R.E.S. On the occurrence of deãlated ♂♂ in the genus <i>Dorylus</i> Fab. (Hym. FORMICIDAE) . . . . .                                             | 79   |
| EDELSTEN, H. M., F.R.E.S. <i>Endromis versicolora</i> (L.) ab. <i>lapponica</i> Bau. (Lepid.) . . . . .                                                                               | 6    |
| <i>Lycaena dispar batavus</i> Obr. at Wood Walton Fen, 1938 (Lepid.) . . . . .                                                                                                        | 6    |
| EVANS, A. C., F.R.E.S. The utilisation of food by the larvae of the buff-tip, <i>Phalera bucephala</i> (Linn.) (Lepidopt.) . . . . .                                                  | 25   |
| EVANS, A. C., F.R.E.S., and GOODLIFFE, E. R., F.R.E.S. The utilisation of food by the larva of the mealworm <i>Tenebrio molitor</i> L. . . . .                                        | 57   |
| FISHER, Katherine J., F.R.E.S. A migration of butterflies in Cochin China (Lepidopt.) . . . . .                                                                                       | 75   |
| FOX-WILSON, G., N.D.H., F.R.E.S., F.L.S. Insect pests of rhododendrons: their distribution in Britain . . . . .                                                                       | 1    |
| FRASER, Lt.-Col. F. C., I.M.S. Retd., F.R.E.S. A note on the function, incidence and phylogenetic importance of the basal accessory antenodal nervures in the order Odonata . . . . . | 63   |
| The evolution of the copulatory process in the order Odonata . . . . .                                                                                                                | 125  |
| HOBBY, Dr. B. M., F.R.E.S. Note on Prof. Carpenter's paper . . . . .                                                                                                                  | 88   |
| JOHNSON, C. G., and MELLANBY, Kenneth, F.R.E.S. Bed-bugs and cockroaches . . . . .                                                                                                    | 50   |
| LE FEUVRE, W. P., M.R.C.S., L.R.C.P. A Phasmid with spermatophore . . . . .                                                                                                           | 24   |
| MCDONOGH, R. S., B.Sc., D.I.C. The parasites of <i>Luffia ferchaultella</i> (Stephens) (Lepidoptera, PSYCHIDAE) . . . . .                                                             | 41   |
| MILLER, N. C. E., F.R.E.S. Oviposition by <i>Heteropteryx dilatatus</i> (Parkinson 1798) (Orth.-PHASMIDAE) . . . . .                                                                  | 48   |
| OLDROYD, H., B.A., F.R.E.S. A note on the pupa of <i>Andrenosoma albopilosum</i> Villn. (Diptera: ASILIDAE) . . . . .                                                                 | 7    |
| POULTON, Sir Edward, F.R.S. "Survival Value of Acridian Protective Coloration" . . . . .                                                                                              | 31   |
| Safe arrival and emergence in England of five pupae of <i>Papilio dardanus</i> Brown, sent from Nairobi by Canon K. St. Aubyn Rogers . . . . .                                        | 35   |
| Freshly emerged <i>Aglais urticae</i> (Linn.), captured by birds, while older specimens were neglected: a whinchat photographed holding a captured Hesperid butterfly . . . . .       | 36   |
| Abundance of bird-life and evidence of attack on butterflies, in Java. . . . .                                                                                                        | 37   |

|                                                                                                                                                                                                                    |                                                                                                                          |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| POULTON, Sir Edward, F.R.S. Wings of butterflies, day- and night-flying moths and other insects collected by the late F. W. Urich in the haunts of a Trinidad bat, <i>Micronycteris megalotis</i> (Gray) . . . . . | 38                                                                                                                       |
| SEVASTOPULO, D. G., F.R.E.S. House lizards and larvae . . . . .                                                                                                                                                    | 33                                                                                                                       |
| THORPE, W. H., M.A., Ph.D. On the occurrence of the male of <i>Nemeritis canescens</i> (Grav.) (ICHTHEUMONIDAE, OPHIONINAE) in Britain . . . . .                                                                   | 47                                                                                                                       |
| UVAROV, B. P., D.Sc., F.R.E.S., and VOLKONSKY, M. A. Notes on a desert grasshopper with digging habits, <i>Eremogryllus hammadae</i> Krauss 1902 (Orthoptera, ACRIDIDAE)                                           | 19                                                                                                                       |
| UVAROV, B. P., D.Sc., F.R.E.S. An American Membracid in Yugoslavia (Hemiptera)                                                                                                                                     | 48                                                                                                                       |
| VARLEY, G. C., F.R.E.S. Frightening attitudes and floral simulation in Praying Mantids . . . . .                                                                                                                   | 91                                                                                                                       |
| Unusual methods of stridulation in a Cicada ( <i>Chidophleps distanti</i> (Van D.)) and a Grasshopper ( <i>Oedaleonotus fuscipes</i> Scud.) in California . . . . .                                                | 97                                                                                                                       |
| The frightening attitude of two Californian Meloid beetles <i>Phodaga alticeps</i> Lec. and <i>Tegrodera erosa</i> Lec. . . . .                                                                                    | 101                                                                                                                      |
| On the structure and function of the hind spiracles of the larva of the beetle <i>Donacia</i> (Coleoptera, CHRYSOMELIDAE) . . . . .                                                                                | 115                                                                                                                      |
| VESEY-FITZGERALD, Desmond, F.R.E.S. Colour-pattern resemblances between wasps and other insects in Trinidad . . . . .                                                                                              | 103                                                                                                                      |
| Observations on bees (Hym. : Apoidea) in Trinidad, B.W.I. . . . .                                                                                                                                                  | 107                                                                                                                      |
| WIGGLESWORTH, V. B., M.D., F.R.S., F.R.E.S. 'Visual adaptation' among Lepidoptera : observations and experiments by F. Süffert . . . . .                                                                           | 111                                                                                                                      |
| WILLIAMS, C. B., Sc.D., F.R.E.S. Records of butterfly migration in Africa (Lepidopt.)                                                                                                                              | 69                                                                                                                       |
| Some butterfly migrations in Europe, Asia and Australia . . . . .                                                                                                                                                  | 131                                                                                                                      |
| Some records of butterfly migration in America . . . . .                                                                                                                                                           | 139                                                                                                                      |
| YARROW, I. H. H., M.A., Ph.D., D.I.C., F.R.E.S. <i>Dermestes aurichalceus</i> Küst. from the larval nest of <i>Thaumetopoea pityocampa</i> (Schiff.) . . . . .                                                     | 14                                                                                                                       |
